

Are You Ready to Take the *HiSET*® Exam?

Preparation is the key to doing your best on the HiSET® exam. You can estimate how well prepared you are for the actual test using the chart below.

1. First, count how many questions you answered correctly on each practice test. Do not include any questions that you did not answer or that you answered incorrectly.
2. Then find the number of questions you answered correctly in the table below to see an estimate of how ready you are to take the HiSET exam.

If you fall in the “Not yet prepared” or “Somewhat prepared” categories, you may want to do additional preparation before you take the exam. Visit hiset.org/test-takers-prepare to find useful tips, strategies and free preparation materials, including the downloadable *Study Companion*.

- Practice tests are intended to complement your preparation and classroom instruction; they will not fully prepare students for the actual HiSET exam. They should be used as indicators only.
- Choose between half-length practice tests, which are approximately half the length of the HiSET exam and may not represent every type of item on the exam, or the newly released full-length practice exams for all content areas.
- The “Well prepared” category scores are not indicators of college and career readiness. They are meant to help provide guidance on the likelihood of a student passing the HiSET exam. Visit hiset.org/test-takers-after-the-hiset to learn how the HiSET exam reflects college and career readiness.
