About HiSET

Some individuals who seek a high school credential may lack the opportunity to experience a traditionally structured high school teaching and learning environment. The HiSET Program seeks to help these individuals identify, acquire, and demonstrate the knowledge and skills that they will need to succeed in postsecondary education and in the workplace.

The *HiSET*® Program was originally co-developed by Educational Testing Service (ETS®) and Iowa Testing Programs (ITP) in furtherance of ETS's mission *to provide innovative and meaningful measurement solutions that improve teaching and learning, expand educational opportunities, and inform educational policy.*

In late 2021, HiSET was purchased by PSI Services, LLC as an extension of its mission *to help people meet their potential.* On a practical level, given PSI's strong presence in the US domestic certification market, PSI believes that there is considerable potential to grow the program, both through increased adoption by states and greater uptake among test takers, as well as exploiting synergies and broadening the range of associated products and services on offer from PSI's wider portfolio.

About PSI

For more than 70 years, PSI has provided Assessment and Talent Management solutions to a range of private and public sector organizations both in the US and internationally. Employers, governments, professional associations, certifying and licensing bodies, and leading educational institutions trust PSI to deliver on its mission of helping people succeed through testing excellence, including test development, administration, multi-modal delivery, and licensure management services.

On January 25, 2024, ETS acquired PSI. This partnership combines ETS's expertise as the world's largest private educational measurement organization with PSI's global leadership in test development and delivery for workforce certification and licensure. Together, ETS and PSI administer nearly 50 million tests annually across more than 200 countries and territories, supporting individuals on their paths to success.

About ETS

Founded as a non-profit in 1947, ETS advances quality and equity in education for people worldwide by creating assessments based on rigorous research. ETS serves individuals, educational institutions, and government agencies by providing customized solutions for teacher certification; English language learning; and elementary, secondary, and postsecondary education — as well as by conducting education research, analysis, and policy studies. ETS develops, administers, and scores more than 50 million tests annually — including the College Board® Advanced Placement Program® (AP®) exams, the *GRE*® General and Subject Tests, the National Assessment of Educational Progress (NAEP), and the *TOEFL*® and *TOEIC*® tests — in more than 180 countries, at over 9,000 locations worldwide.

About ITP

ITP is a non-profit research, development, and outreach unit in the College of Education at the University of Iowa. ITP’s mission is to pursue:

- research that improves the practice of educational measurement
- design and development of assessments for a variety of purposes and audiences including educators; federal, state, and local governments; and academic institutions
- outreach that delivers assessment results and supports the use of assessment information by local, state, national, and international audiences

Test Content

The HiSET measures knowledge and skills in five subject areas: Language Arts – Reading, Language Arts – Writing, Mathematics, Science, and Social Studies.

Overview

The HiSET Program has been in operation since January 2014. This report provides volume and test performance information for examinees who took the HiSET between January 1, 2024, and December 31, 2024. The intent of this report is to help HiSET examinees, score users, and policy makers understand HiSET scores and to encourage appropriate score interpretation and use.

The HiSET Exam

HiSET examinees test in five content areas: Reading (Language Arts – Reading), Writing (Language Arts – Writing), Mathematics, Science, and Social Studies. [The Test at a Glance documents](#) — which are available for download on the [HiSET Website](#) — provide descriptions of the specifications behind current HiSET forms. Each subject-area test produces a score on a 1 – 20 reporting scale. We used standard setting studies (Tannenbaum & Reese, 2014) to recommend the minimum test scores (i.e., cut scores) needed for examinees to be considered qualified enough to earn a high school equivalency certificate. The tests consist of multiple-choice items, except for a direct writing task associated with the Writing test. Table 1 displays the number of items and time limits associated with each test.

Table 1. Number of Test Items and Time Limits

CONTENT AREA	NUMBER OF ITEMS	NUMBER OF MINUTES
Language Arts – Reading	50	65
Language Arts – Reading (Spanish)	50	80
Language Arts – Writing	60 + essay	120
Mathematics	55	90
Science	60	80
Social Studies	60	70

Scoring the HiSET Exam

With the exception of the essay portion of the Writing test, HiSET item responses receive a score of either correct or incorrect, and the sum of the correct responses becomes the raw score. There is no penalty for answering incorrectly. Raw scores on the Mathematics, Reading, Science, and Social Studies tests are converted directly to scores on the 1 – 20 reporting scale. In Writing, the scoring and scaling procedures differ slightly from the other four subtests due to having two distinct sections: the first section consists of 50 objectively scored multiple-choice items, and the second is an essay. Both sections are first scored and scaled independently. Number-correct scores on the 50-item multiple-choice section are converted to a 1-14 scale (rather than a 1-20 scale). The essay score is reported using a 0-6 scale that ranges from “little or no skill” to “proficient skill.” The total Writing scores are then computed as the sum of the two sections, placing them on the standard 1-20 scale.

Explanation of the Scaled Scores

Each of the five tests in the HiSET battery is scored on a scale of 1 – 20. In order to pass, an examinee must do all three of the following:

- achieve a score of at least 8* on each of the five individual tests.
- score at least 2 out of 6 on the essay portion of the Writing test.
- have a total combined score on all five subject tests (Battery) of at least 45.

*** 1) Minimum passing score is based on HiSET “pass” cut score requirements. Credential issuing agencies may set their own requirements. The pass rate data calculated in this report is calculated based on the HiSET “pass” score requirement. 2) The total Writing score is the sum of the multiple-choice section and the essay section. An examinee must achieve a total score of at least 8 as well as an essay score of at least 2 to pass the Writing test.**

Samples Reported

The samples in this report sometimes refer to examinees who have taken individual tests; and sometimes the samples refer to completers who have taken the full battery of tests. Descriptions of the samples reported are provided below.

Language. All samples unless otherwise noted are composed of both English and Spanish examinees. For battery tables, completers should have taken all five tests in Spanish to be considered Spanish completers.

Individual Tests. Tables which include test-specific information are based on the sample of examinees that have attempted the specific test. These tables report examinee first attempt and best attempt to pass the test in 2024.

Number of Examinees Tested. Tables reporting number of examinees tested provide a count of unique examinees attempting any individual test in 2024.

Battery Completion. Tables which include information about the battery consist of only examinees that have completed all five individual HiSET subtests — however, completers have not necessarily passed the battery or any individual test. A “completer” refers to an examinee that has completed the final test of their battery in 2024.

Battery Pass. Tables which include information about battery passers, consist of only examinees who have completed and passed the final test of their battery in 2024.

Examinee State. For the purposes of assigning examinees to a state, a completer is considered completed only in the state in which he or she most recently tested.

Identifying Questions. For certain identifying questions, examinees had the option to expressly indicate that they did not wish to provide a response, or to simply refrain from responding at all. Response rates reported include those who expressly indicated that they did not wish to respond. The percentages for responses reported in the tables, including those who expressly chose not to respond, sum to 100 percent.

Trend Data. In addition to the data reported for 2024, trend data comparing results for 2020 through 2024 are summarized in Table 26.

State Policies

State testing policies can be found at the following website:

<https://hiset.org/test-takers-requirements/#find-your-state>

HiSET Annual Report

The Standard Setting

Standard-setting studies (Tannenbaum & Reese, 2014) were conducted in 2014 to recommend minimum test scores (cut scores) needed to be considered qualified-enough to earn a high school equivalency certificate. These recommendations were shared with the HiSET Governing Board along with other data to inform decisions about where to set the operational cut scores; these other sources of data included the correspondence between HiSET scores and scores on the GED and the ACT, and previous passing rates on the HiSET test. Based on a thoughtful and inclusive review and discussion, the recommended cut scores were lowered. Adjustments to recommended cut scores often occur to better align cut scores with their intended use (Geisinger & McCormick, 2010). This practice is consistent with the understanding that the process of setting standards is similar to forming a policy, where the goal is to establish a reasonable and appropriate decision-rule (Cizek & Bunch, 2007; Kane, 2001; Kane & Tannenbaum, 2013).

Cizek, G. J., & Bunch, M.B. (2007). *Standard setting: A guide to establishing and evaluating performance standards on tests*. Thousand Oaks, CA: Sage.

Geisinger, K. F., & McCormick, C.A. (2010). Adopting cut scores: Post-standard-setting panel considerations for decision makers. *Educational Measurement: Issues and Practice*, 29, 38-44.

Kane, M. T. (2001). So much remains the same: Conception and status of validation in setting standards. In G. J. Cizek (Ed.), *Setting performance standards: Concepts, methods, and perspectives* (pp. 53-88). Mahwah, NJ: Lawrence Erlbaum.

Kane, M.T., & Tannenbaum, R.J. (2013). The role of construct maps in standard setting. *Measurement: Interdisciplinary Research & Perspectives*, 11, 177-180.

Tannenbaum, R.J., & Reese, C.M. (2014). *Recommending Passing Scores for the High School Equivalency Test (HiSET®) (RM 14-06)*. Princeton, NJ: Educational Testing Service.

* Response rates are not reported when samples are under 10.

* No responses for a given category are indicated by “—”.

Of the completers who self-reported race, 3.4 percent reported American Indian or Alaskan Native, 1.8 percent reported as Asian, 14.8 percent reported as Black or African American, 0.6 percent reported as Native Hawaiian or Other Pacific Islander, 50.6 percent reported as White, 8.5 percent reported as Other, and 25.1 percent indicated that they did not wish to respond. Examinees had the option to select multiple racial categories. Examinees who indicated being Hispanic had the option of separately reporting a racial identification indicated in this table. The underlying survey question on which this table is based did not include a Hispanic category, which may have led Hispanic examinees to choose “Other” or to not respond.

Examinees were asked to choose the one best reason from a provided list for taking the test. The list in the table below contains: Technical School (TECH), Two-Year College (2-Yr College), Four-Year College (4-Yr College), Get a Job, Keep Current Job, Role Model, Satisfaction, Public Assist, Military (MIL), Early Release, Court Order, and Other. 25.2 percent of all completers reported their reasons for taking the test. For those who provided reasons, 53.6 percent of the examinees were taking the test to further their education, whether to enter a technical program, a two-year college, or a four-year college; 13.8 percent were taking the test to get a job; and 2.1 percent were taking the test to keep their current job.

* Response rates are not reported when samples are under 10.

* No responses for a given category are indicated by "—".

Examinees could select multiple responses to indicate how they prepared for the test. Of the completers reporting, the majority attended test preparation classes and/or were tutored (46.2 percent), followed by using an online or internet resource (30.4 percent), and buying a hard copy test preparation book (11.5 percent).

* Test summary statistics are not reported for samples fewer than 10.

The average battery scaled scores for the states ranged from 49.7 to 70.1 for first attempts and from 53.7 to 71.4 for best attempts. The average scaled score across all states was 60.2 for first attempts and 62.9 for best attempts.

* Battery summary statistics are not reported for samples fewer than 10.

Reported reason for testing is provided for Battery Passers. The list in the table below contains: Technical School (TECH), Two-Year College (2-Yr College), Four-Year College (4-Yr College), Get a Job, Keep Current Job, Role Model, Satisfaction, Public Assist, Military (MIL), Early Release, Court Order, and Other.

Table 20. Battery Passers with Reported Reason for Testing

* Battery passing rates are not reported for state samples fewer than 10.

* No responses for a given category are indicated by “—”.

Examinees had the option to select multiple racial categories. Examinees who indicated being Hispanic had the option of separately reporting a racial identification indicated in this table. The underlying survey question on which this table is based did not include a Hispanic category, which may have led Hispanic examinees to choose “Other” or to not respond.

Table 25. Battery Passing Rates by Reported Races for Examinees Passing on Their First Attempt
